12 test prompts for systematic Jetson model evaluation

Summary of Test Prompts

#	ID	Category	Prompt Name
1	html_profiles	html	HTML Profile Cards Page
2	html_game	html	HTML Web Browser Game
3	python_code	python	Python Data Processing
4	iambic_pentameter	poetry	Iambic Pentameter Poem
5	math_proof	math	Mathematical Proof
6	creative_writing	creative	Creative Writing - Short Story
7	func_web_search	function_call	Function Call: Web Search
8	func_terminal	function_call	Function Call: Terminal Command
9	func_write_file	function_call	Function Call: Write File
10	func_read_file	function_call	Function Call: Read File
11	func_sqlite	function_call	Function Call: SQLite Query
12	func_email	function_call	Function Call: Email Draft

Prompt 1: HTML Profile Cards Page

ID	html_profiles
Category	html

Prompt:

Create a complete HTML page with CSS that displays 3 profile cards side by side. Each card should have a circular avatar placeholder, a name, a job title, and a short bio. Use flexbox for layout. Include hover effects on the cards. Make it responsive so cards stack vertically on mobile. Return only the HTML file.

Scoring Rubric:

Score	Criteria
7-8	Complete HTML with most features, minor CSS issues
5-6	Basic HTML, missing responsiveness or hover, functional but rough
3-4	Incomplete or broken layout, missing major features
10	Complete, responsive, hover effects, clean CSS, valid HTML, visually appealing
1-2	Not HTML or completely wrong

Prompt 2: HTML Web Browser Game

ID	html_game
Category	html

Prompt:

Create a single HTML file with JavaScript for a simple click-the-target game. A colored circle appears at random positions on a canvas. The player clicks it to score points. Show the score, a 30-second timer, and a game over screen with final score. Include a start button. Return only the HTML file.

Scoring Rubric:

Score	Criteria
7-8	Mostly working game, minor bugs
5-6	Partial game, missing timer or score tracking
3-4	Broken JavaScript, game doesn't function
10	Working game with all features: random targets, scoring, timer, game over, start button
1-2	Not a game or completely wrong

Prompt 3: Python Data Processing

ID	python_code
Category	python

Prompt:

Write a Python function called `process_grades` that takes a list of dictionaries, where each dict has 'name' and 'score' keys. The function should: 1) Calculate the average score, 2) Find the highest and lowest scorers, 3) Return a summary dict with `avg_score`, `top_student`, and `bottom_student`. Include type hints and a docstring. Include a test example.

Scoring Rubric:

Score	Criteria
7-8	Correct logic, missing type hints or docstring or edge case handling
5-6	Works for basic case, minor logic errors or missing test
3-4	Broken logic, won't run correctly
10	Correct logic, type hints, docstring, test example, handles edge cases, clean code
1-2	Not Python or completely wrong

Prompt 4: Iambic Pentameter Poem

ID	iambic_pentameter
Category	poetry

Prompt:

Write a 6-line poem in strict iambic pentameter about a lighthouse keeper watching a storm. Each line must have exactly 10 syllables with the da-DUM da-DUM da-DUM da-DUM da-DUM rhythm. Do not add extra commentary. Return only the poem.

Scoring Rubric:

Score	Criteria
7-8	6 lines, mostly correct meter, 1-2 syllable count errors
5-6	6 lines but meter is inconsistent, or wrong syllable count on multiple lines
3-4	Wrong line count, mostly wrong meter
10	Exactly 6 lines, perfect iambic pentameter (10 syllables, correct stress), evocative imagery
1-2	Not a poem or completely ignores meter requirement

Prompt 5: Mathematical Proof

ID	math_proof
Category	math

Prompt:

Prove that the sum of the first n natural numbers equals $n(n+1)/2$. Use mathematical induction. Show the base case, the inductive hypothesis, and the inductive step clearly. Return only the proof.

Scoring Rubric:

Score	Criteria
7-8	Correct proof, minor notation or clarity issues
5-6	Mostly correct, one step unclear or slightly wrong
3-4	Incorrect proof, major logical errors
10	Correct base case, correct inductive hypothesis, correct inductive step, clear notation
1-2	Not a proof or completely wrong

Prompt 6: Creative Writing - Short Story

ID	creative_writing
Category	creative

Prompt:

Write a 200-word short story about a musician who discovers their old guitar can play memories. The story should have a clear beginning, middle, and end. Use vivid sensory details. Return only the story.

Scoring Rubric:

Score	Criteria
7-8	Good story, slightly over/under word count, decent sensory detail
5-6	Basic story, weak narrative arc, far from word count
3-4	Barely a story, no narrative structure
10	Compelling narrative arc, vivid sensory details, ~200 words, creative premise well-executed
1-2	Not a story or completely off-topic

Prompt 7: Function Call: Web Search

ID	func_web_search
Category	function_call
Expected Tool	web_search

Prompt:

I need to find recent news about renewable energy breakthroughs. Search the web for the latest developments in solar and wind technology from this month.

Scoring Rubric:

Score	Criteria
7-8	Attempts web_search but query could be better
5-6	Mentions searching but doesn't properly call the tool
3-4	Answers from training data, doesn't attempt tool use
10	Calls web_search with a well-formed query about renewable energy breakthroughs
1-2	Completely off-topic or refuses

Prompt 8: Function Call: Terminal Command

ID	func_terminal
Category	function_call
Expected Tool	terminal

Prompt:

Check the disk usage on my system and tell me how much free space is left on the root partition.

Scoring Rubric:

Score	Criteria
7-8	Attempts terminal command but slightly wrong syntax
5-6	Mentions checking disk but doesn't call terminal
3-4	Gives generic answer without running anything
10	Calls terminal with 'df -h' or equivalent to check disk usage
1-2	Completely off-topic or refuses

Prompt 9: Function Call: Write File

ID	func_write_file
Category	function_call
Expected Tool	write_file

Prompt:

Create a file called todo.txt in my home directory with these items: 1. Buy groceries 2. Call dentist 3. Fix the sink. Save it to ~/todo.txt.

Scoring Rubric:

Score	Criteria
7-8	Attempts write_file but path or content slightly off
5-6	Mentions creating file but doesn't call write_file
3-4	Gives instructions without actually writing
10	Calls write_file with correct path and all 3 todo items
1-2	Completely off-topic or refuses

Prompt 10: Function Call: Read File

ID	func_read_file
Category	function_call
Expected Tool	read_file

Prompt:

Read the contents of /etc/hostname and tell me what it says.

Scoring Rubric:

Score	Criteria
7-8	Attempts to read but wrong tool or path
5-6	Mentions reading but doesn't call a tool
3-4	Guesses the hostname without reading
10	Calls read_file or terminal with 'cat /etc/hostname'
1-2	Completely off-topic or refuses

Prompt 11: Function Call: SQLite Query

ID	func_sqlite
Category	function_call
Expected Tool	terminal

Prompt:

Query the database at /home/walker/data/clinic.db for all patients seen in the last 30 days. Show me their names and visit dates.

Scoring Rubric:

Score	Criteria
7-8	Attempts SQLite query but syntax or date logic slightly off
5-6	Mentions SQL but doesn't execute it
3-4	Gives generic advice without querying
10	Constructs and runs a proper SQLite query with date filtering
1-2	Completely off-topic or refuses

Prompt 12: Function Call: Email Draft

ID	func_email
Category	function_call
Expected Tool	none

Prompt:

Draft an email to my colleague Sarah about rescheduling our Thursday meeting to Monday at 2pm. The email should be professional and brief.

Scoring Rubric:

Score	Criteria
7-8	Good email, missing subject line or slightly verbose
5-6	Basic email, missing structure or tone issues
3-4	Barely an email, no structure
10	Well-structured email with subject line, greeting, body, sign-off. Professional tone, brief, clear about reschedule
1-2	Not an email or completely off-topic
